Note: This API call is for DOS and Win16 personality only. Use Family API for portability.

2018/09/07 05:04 · prokushev · 0 Comments

Int 21H, AH=4FH

Version

2 and higher

Brief

“FINDNEXT” - FIND NEXT MATCHING FILE

Family API

Input

```
AH = 4Fh
Disk Transfer Area contains data block from previous FindFirst or
  FindNext call
```

Return

```
CF clear if successful
    Disk Transfer Area updated
CF set on error
    AX = error code (12h) (see #01680 at AH=59h/BX=0000h)
```

Notes

```
under Novell DOS 7, if the FindFirst call (AH=4Eh) had CX=0088h, then
  the next matching deleted file will be returned
since the entire state of a FindFirst/FindNext sequence is contained
  in the data block in the DTA, other disk operations such as renaming,
  moving, deleting, or creating files can cause inaccurate directory
```

```
  searches, such as finding the same file twice
 BUG:   DR DOS 3.41 and 5.0 return the Directory attribute for the volume
label
```
