

Текущее состояние проекта

Проект osFree находится в состоянии глубокой альфа-версии. На данный момент osFree ведет работу над низкоуровневыми частями ОСб такими как загрузчик, экспериментальный проект OS/2 personality для микроядра L4. Также, у нас есть часть утилит командной строки, таких как CMD.EXE и утилиты обслуживания дисков и файлов.

На данный момент множество утилит уже готово (написано участниками проекта или адаптировано из других проектов). В основном, за это мы должны быть благодарны JP Software за исходные коды их командного процессора 4OS2 и Bartosz Tomasik за большинство других утилит командной строки. Также мы благодарны всем тем, чьи исходные тексты были использованы в проекте, напрямую или косвенно. Но здесь все еще осталось очень много работы.

However, don't limit yourself to command line tools. If you're interested in developing a kernel loader (some source exists), kernel, device drivers, or other parts of the osFree system, you are welcome to work on them! We will be glad to see you as an osFree developer!

We have a [dotProject](#) management system installed on this server to maintain the status of osFree. Currently this system is not integrated into DokuWiki, and is open to anyone logged into the guest account.

osFree roadmap

For osFree development plan, milestones (passed ones, current ones and the correspondence of them to system versions, see osFree [roadmap](#))

Completeness/status of each component

Here is each small component status:
